Dear Tony,

FUELSTAR REPORT

I would like to update you with the positive results on your Fuelstar product.

My 80 series turbo diesel Landcruiser was fitted with the Fuelstar in October 2007. Before installing the unit, I was getting an average of 615kms to a tank of fuel (95 litres) in main tank. Now I am getting an average of 745kms per tank. An overall result more than 20%!!!! I have also noticed a great power increase and my black smoke has been greatly reduced and the engine seems to run smoother.

Even more impressive than this are the results achieved on country runs (no stopping at lights), an average of 731kms as opposed to 584kms before fitting the unit. More than 25% savings. This is while towing a camper trailer weighing approx. 1000kg.

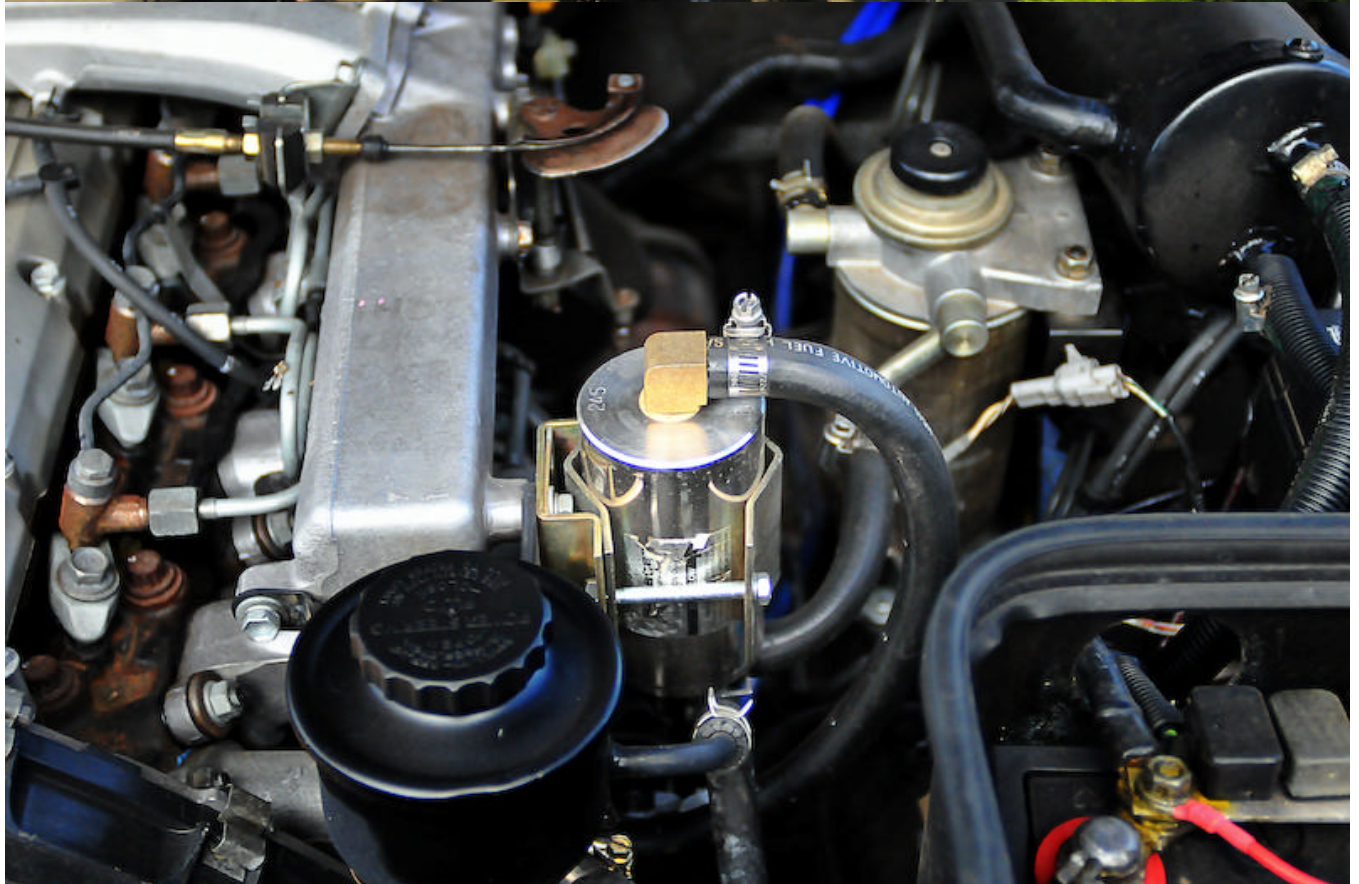

Knowing firsthand that the product works as claimed, I would welcome anyone to contact me for an independent report and updated results.

Robert Wiseman
