NEWS RELEASE

For immediate release 25 August 2006

Fuelstar is pleased to announce the conclusion of a distribution agreement between the Australian distributor, Auto Parts Wholesalers Pty Ltd and National Parts (formerly Federal-Mogul) as its preferred supplier of the Fuelstar product in Australia.

National Parts is Australia's largest independent parts wholesaler, supplying all major parts houses including Repco, Bursons, Super Cheap, Auto One, Auto Barn and its own chain of Autopro stores, now numbering almost 200 nationwide.

National Parts supplies some 3,000 auto parts stores and potentially over 13,500 workshops throughout Australia. It provides the highest levels of service and the widest range of parts to the automotive aftermarket.

National Parts took on the role after doing extensive testing of the Fuelstar product to verify its product claims.

With the cost of unleaded fuel predicted to reach \$1.80 per litre by the end of 2006, Fuelstar is the most cost effective method of reducing fuel bills and improving engine performance in all petrol, diesel and LPG engines.
