

GOLDLINK BOSS INSTALS FUELSTARS IN HIS NEW LUXURY CHARTER BOAT

The owner of GoldLink Warehousing and Distribution Ltd, Brian Aitchison, has been using Fuelstars in his fleet of Mack and Cummins-powered International trucks for the past three years. After rigorous testing, Mr Aitchison concluded that the Fuelstars were saving him 12% on his fuel bill.

He is so enamoured with the product that he has now installed Fuelstars in his recently acquired Auckland based 54' Riviera charter boat, 'Outer Limits'.

The boat runs twin 600 bhp MTU's. Mr Aitchison said "the engines are far more responsive, the small amount of black smoke previously evident has disappeared and the fuel consumption has decreased by at least 10%. The extra torque also comes in handy at times".
